BRADY

WHEN PERFORMANCE MATTERS MOST™

Laboratory Identification

Labels, printers & software for the laboratory

About BRADY

Once you have worked with BRADY, our name will stick with you, (just like our labels) because BRADY is one of the world's leading labelling and identification specialists.

Innovative

At BRADY we continue to improve. We have many customers from all industries, and we strive to be ahead of their needs by continuing to invest in research for even more performant solutions. By developing more user-friendly and efficient concepts, we give our thousands of customers the best in the market.

Strength

At BRADY, we believe our biggest strength is the wide range of identification and safety solutions we can offer our customers, whether it's labelling the smallest component or complete signage for an entire warehouse. We're also proud to offer many products and services - from printers, scanners and software to service contracts and on-site training - that compliment any identification job.
And don't forget, our wide network of expert distributors can always offer you a tailor-made solution to meet your specific requirements.

Trust

For almost a hundred years, BRADY has been connected with quality, trust and stability. We demand the best for your products and services, because we know, better than anyone, the importance of good and reliable identification. Identification looks like a small detail, but every professional knows that this kind of detail is crucial to any business.

Inform

We also have specialised dealers in your region, who can answer all your identification and labelling questions, specific to your activity. They will be happy to provide you with all kinds of options and solutions with no obligation.

BRC Listed NYSE
THE NEW YORK STOCK EXCHANGE

SYSTEM CERTIFICATION ISO 9001:2000 SGS

Brady products are sold on the condition that the purchaser will test them in actual use and determine for himself/herself their suitability to his/her intended purpose Brady warrants to the purchaser that Brady products are free from defects in material and workmanship but limits its obligation under this warranty to the replacement of the product which has been shown to Brady's satisfaction to have been defective at the time of its purchase.

The warranty does not extend to any persons who have acquired the product from the purchaser. It is in lieu of any other warranty, including every warranty of sale-ability, marketability or suitability for the intended purpose, and is also in lieu of any other obligation or liability on the part of Brady.

Under no circumstances will Brady be liable for losses, damage, costs or subsequent damage of whatever nature which may arise in connection with the use of, or inability to use, Brady's products.

Simplify Your Laboratory Identification

Brady's line of laboratory identification products are designed to serve the world's biotechnology, agricultural, environmental and forensic researchers. Whether you work in pathology, histology, chromatography or other areas of science, Brady labelling solutions can help you maintain Good Laboratory Practice (GLP).
The new products meet four current labelling challenges associated with sample container tracking:

- Labels that "match" existing vial, slide, and well plate sizes
- Labels that are readable by everyone, every time
- Labels that are durable under extreme conditions, including freezer storage, liquid nitrogen, autoclave and hot water baths and are resistant to solvents including Xylene, DMSO and Ethanol
- Easy bar coding and scanning allowing researchers to include more label information and drastically reduce human error

Hand-written versus printed labels

Hand-Written Labels

- Hand-written information is difficult to read
- Ink smears easily when handled
- Limited write-on area
- Time consuming
- Ink fades while stored long term
- Chemicals and solvents wash away ink

Brady Printed Labels

- Ink won't smear or fade
- Crisp, clear and readable text
- More information fits on label
- Quickly and easily design and print labels (auto serialize)
- Increased legibility/durability
- Chemical and solvent resistant

Lab-durable labels

For best adhesion, we recommend that you do not touch the adhesive side of the label when wrapping it around your vial or tube.

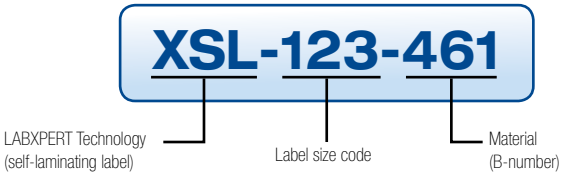

Brady's special self-laminating or wrap around label protects your label's legend from extreme temperature, chemicals and solvents.

- Printing is readable every time
- Clear portion wraps around and laminates the legend
- Provides window to view liquid level inside vial
- Low profile label resists jamming in centrifuge or racks
- Labels withstand liquid nitrogen (-196°C), freezer (-80°C), autoclave (+121°C) and chemicals like Xylene

Part number explanation

Most Brady references for printable labels follow the same three-part format: The first code indicates the technology, the second part is a number indicating the label size (where applicable) and the third part indicates the Brady material (where applicable).

			APPLICATION								ENVIRONMENT				OTHER QUALITIES
	Suggested Ribbon Series	Temp. (°C)	Vial/Tube	Slide	Conicals/Bottles	Well Plate	Straw	Tissue Cassette	General Lab ID	Freezer	Liquid Nitrogen	Autoclave (121°C)	Hot Water Bath (100°C)	Low-Profile	Additional Features
Freezerbondz™ Polyester															
B-490	R-4300	-196 to 120	✓		✓	✓			✓	✓	✓	✓	✓	✓	Can be applied to frozen surfaces including glass and polypropylene stored in liquid nitrogen. Material must slightly overlap itself.
B-492	R-6400	-196 to 120	✓		✓	✓	✓		✓	✓	✓	✓		✓	Can be applied to frozen surfaces including glass and polypropylene stored in liquid nitrogen; Low profile
Nylon Cloth															
B-499	R-4300, R-6000, R-6200B	-196 to 90	✓		✓	✓			✓	✓	✓	✓			Permanent adhesion; write-on capabilities. Temperature range increases to 121°C when used in autoclave process
Paper															
B-424	R-4300	-80 to 50		✓					✓	✓					Permanent adhesive; write-on capabilities; good contrast and smear resistance
Polyester															
B-423	R-6000, R-4410 colours	-80 to 120				✓			✓	✓		✓			Permanent acrylic adhesive; ideal for flat surfaces
B-430	R-6000	-80 to 100				✓			✓	✓		✓			Clear polyester with permanent acrylic based adhesive; withstands numerous solvents and can be applied to variable surfaces
B-432	R-6000	-80 to 100				✓			✓	✓		✓			Clear polyester with permanent acrylic based adhesive; withstands numerous solvents and can be applied to variable surfaces
B-433	R-6000	-40 to 100							✓	✓		✓			Removable
B-461	R-4300	-196 to 130	✓		✓		✓			✓	✓	✓	✓	✓	Permanent adhesive; suitable for liquid nitrogen application if materialis wrapped around itself, as in self-lamination; write-on capabilities. Temperature range increases to 121°C when used in autoclave process
B-482	R-6400	-80 to 130						✓		✓		✓	✓		The B-482 label material, combined with Brady's R6400 ribbon, provides the durability and print quality that histology and anatomic pathology labs need for accurate, identifiable specimen labelling. Paraffin and solvent resistant.
B-488	R-4300, R-6200	-80 to 120		✓		✓			✓	✓		✓			Permanent acrylic adhesive; ideal for flat surface; write-on capabilities; excellent solvent resistance and xylene resistance
B-8423	R-6000	-80 to 120				✓			✓	✓		✓			Permanent acrylic adhesive,; semi-gloss finish; excellent for bar code labels
Polypropylene															
B-425	R-6400	-70 to 100	✓		✓	✓			✓	✓					Excellent solvent resistance
B-449	R-4300	-80 to 90	✓		✓				✓	✓		✓			Ideal for temporary labelling applications. Removable from flat surfaces; write-on capabilities
StainerBondz™ Polyester															
B-481	R-6400	-80 to 130		✓					✓	✓		✓	✓		Clear polyester with remain resistant when exposed to xylene and other chemicals that are commonly used in the slide staining process
Tamper-Resistant Vinyl															
B-351	R-6200	-80 to 120				✓			✓	✓					Tamper-evident with a permanent acryic adhesive; fractures easily to prevent removal
B-7351	R-6200	-40 to 100				✓			✓	✓					Tamper-evident with a permanent acryic adhesive; fractures easily to prevent removal
Vinyl															
B-427	R-4300	-80 to 70	✓		✓		✓			✓	✓				Permanent acrylic adhesive; self-laminating; wirte-on capabilites; suitable for liquid nitrogen applicaton and can be used to identify a frozen vial if label material is wrapped around itself, as in self-lamination. Temperature range goes to -196°C if material is wrapped around vial and overlaps itself
B-439	R-6000, R-4900, R-4400WT	-80 to 40				✓			✓	✓					Available in Blue, Green, Orange, Red, White and Yellow
B-595	R-6000 (for black), R-4400 or R-6900 for colours	-40 to 82				✓			✓	✓					Available in White, Red, Yellow, Green, Blue, Orange, Black, Grey. Brown, Gold, Purple and Clear
Vinyl Cloth															
B-498	R-6200	-80 to 80	✓		✓	✓		✓	✓	✓					Removable from flat surfaces; write-on capabilities

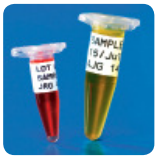

Vial / Tube Labels

- (F) Freezer environment
- (N) Liquid nitrogen environment
- (A) Autoclave environment
- (H) Hot water bath (100°C)
- (S) Self-laminating label
- (L) Low-profile (extremely thin) label
- (R) Removable

Brady's vial and test tube labels are designed to withstand extreme laboratory solvents like Xylene, Ethanol, Alcohol amd DMSO, ensuring that the specimen identification is always legible - and will not smear, fade or fall off.

B-492 (FreezerBondz™)

"The new B-492 labels and the software have transformed our sample labelling. The ease of creating an excel sheet with more information than you could write on a label have ensured we have clear easy to read labels. Everyone in the laboratory finds it easy to use."

Institute of Cancer Research UK

Read the full article on http://www.bradyeurope.com/labid

For best adhesion, we recommend that you do not touch the adhesive side of the label when wrapping it around your vial or tube

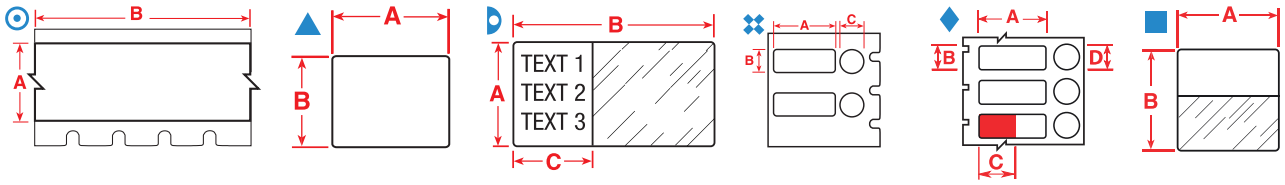

Lab-durable labels

Brady's special self-laminating or wrap around label protects your label's legend from extreme temperature, chemicals and solvents

- Printing is readable every time
- Clear portion wraps around and laminates the legend
- Provides window to view liquid level inside vial
- Low profile label resists jamming in centrifuge or racks
- Labels withstand liquid nitrogen (-196°C), freezer (-80°C), autoclave (+121°C) and chemicals like Xylene

- (F) Freezer environment
- (N) Liquid nitrogen environment
- (A) Autoclave environment
- (H) Hot water bath (100°C)
- (S) Self-laminating label
- (L) Low-profile (extremely thin) label
- (R) Removable

B-492 (FreezerBondz™)

"The special FreezerBondz™ labels are very reliable: they stick to the glass vials we use for our frozen fish tissue samples and, just as important, they remain readable to maintain accurate sample identification in long-term storage."

Centre for Ecology & Hydrology, UK

Slide Labels

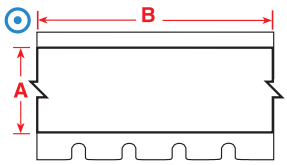

- (F) Freezer environment
- (N) Liquid nitrogen environment
- (A) Autoclave environment
- (H) Hot water bath (100°C)
- (S) Self-laminating label
- (L) Low-profile (extremely thin) label
- (R) Removable

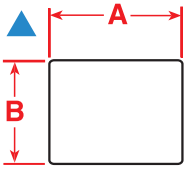

Brady B-481 StainerBondz™ Slide Labels are designed to adhere to slides from sectioning through staining - for crisp, clear, long-term sample traceability. StainerBondz Slide Labels resist exposure to xylene, ethanol and other solvents, providing reliable traceability of slides from the front of your process. Identify your slide with StainerBondz labels before staining and know your samples will remain legible for the years ahead.

BSP™31
LABEL ATTACHMENT SYSTEM

- Brady has developed a unique set of products for the histology and anatomic pathology market in order to guarantee **pre-process identification for tissue samples** allowing **traceability** throughout laboratory processes as well as long term storage (20 years).
- The BSP™31 Label Attachment System is designed to mechanically fasten and adhesive label to a tissue cassette before the tissue embedding process. This easy-to-use unit creates rivets on the label which prevent the label from detaching during the embedding process or during long-term storage
- When a cassette is inserted into the front of the unit, a clamp automatically grabs the cassette. In less that a minute, four small heat probes pierce through the label and front plastic of the cassette. Heat applied to the probes melts the cassette plastic and forms rivets on the label. When the unit retracts the probes from the cassette, the cassette is released and the user can remove it and place the biospecimen onto the cassette.
- The BSP™31 unit must be used exclusively with **Brady B-482 label material** and the R-6400 thermal transfer printer ribbon.

B-482 Tissue cassette labels

"We have received very positive feedback on the Brady cassette labels from researchers. They report that, as well as looking much more professional, the printed labels save time when they need to search through their archived blocks for a particular sample. Black text printed on a white label is very much quicker and easier to read than pencil on a green cassette. The clear labels therefore eliminate any confusion or mistakes which could occur with handwritten data."

Cardiff University – School of Biosciences, UK

Specimen Labelling Solution for Histology and Anatomic Pathology

As part of Brady's **complete laboratory labelling solution**, our combination of the B-482 Tissue Cassette label and the BSP™31 Label Attachment System, **ensures your specimen labels will stick throughout processing, embedding and sectioning**.

B-498 Re-Identify Tissue Cassettes Labels

Tissue cassettes are often re-identified when labs collect samples from various biorepositories. Typically, each laboratory has its own unique way of identifying samples, which creates a need to re-identify samples in a common way.

Brady B-498 post-process labels offer customers the optimal way to organise these specimens and conduct further studies. These labels can be applied directly onto the cassettes, on pure paraffin wax and on top of another label or identifier.

This is not the same as Brady's B-482 tissue cassette solution. **B-498 Re-identify labels are applied after processing and are never used with the BSP31 label attachment system.**

Choose Your Printer

LABPAL™ Laboratory Label Printer

LAB PAL™ Label Printer is portable, easy-to use and makes identifying your samples quicker and more efficient.

BMP™21 Hand-held Label Printer

BMP™21 portable printer can quickly and easily create clear, legible labels that stay stuck for years.

LABXPERT™ Laboratory Labelling System

With the LABX-PERT™ Laboratory Labelling System you have a powerful, yet affordable tool at your fingertips! Produce legible, professional looking labels for your lab samples, while drastically reducing the time it actually takes to label.

BMP™71 Portable Label Printer

The BMP71 is your essential tool that handles all your labelling needs.

BBP™11 Desktop Printer Series

Small , compact and economical, ideal for general purpose product identification, wire and cable marking and laboratory identification.

IP™ Thermal Transfer Printer Series

The first THT printer in industrial applications to use smart cell technology where the printer communicates with the material ribbbon and software.

BradyPrinter™ BP-PR Plus Series

A rugged industrial printed range that is an ideal printing solution that meets the professional needs of Product Identification and Traceability applications in the industrial market.

BMP™21 tapes can be used in the LABPAL™ Printer

LABPAL™ Laboratory Label Printer & BMP™21 Hand-Held Label Printer

LABPAL™
Laboratory Label Printer

- The LAB PAL™ label printer is portable, easy to use and makes identifying your samples quicker and more efficient
- Portable/Hand-held
- Recommended for 25 labels at a time
- Labels withstand extreme laboratory temperatures and solvents
- Pre-programmed vial and slide sizes
- One-touch time/date stamp
- Serialisation feature for quicker aliquots
- Laboratory symbols
- Affordable - every laboratory technician needs one
- Banner mode for general labelling
- Operates on 6 AA batteries or optional AC power Adaptor

Order Ref.	Order Reference	Description
033942	ID PRO-HC	Hard-sided Carry Case
081026	IDPAL-ACEUR	ID PAL AC Adapter – Europe 220V
110417	BMP21-AC UK	AC Adaptor - UK 240V
250080	LABPAL	LAB PAL™ Label Printer

BMP™21
Hand-held Label Printer

- Why spend time creating labels that are difficult to read and don't stick? With the BMP™21 Hand-held Label Printer, eliminate guesswork and enjoy fast and easy formatting of commonly use label types for marking vial and tubes, bottles, well plates and much more. You can be confident your Brady labels will remain stuck for years. Create clear legible labels with industrial-strength staying power to withstand even the harshest environments. They won't fall off, smear or fade.
- Simple to operate and quick to print.
- the BMP21 is a labelling solution that leads to increased productivity, supreme accuracy and unrivalled quality for a safer and more efficient workplace.
- Robust Hard-wearing Printer
- Hard-wearing design
- 203 dpi thermal transfer print
- Large LCD Display (3 lines of text, 1 line of icons)
- Left or right handed cutter activation
- Magnet and strap accessories
- Flashlight accessory for use in confined or low light areas

BMP™21 tapes can be used in the LABPAL™ Printer

LABXPERT™ Laboratory Labelling System

LABXPERT™
Laboratory Labelling System

- With Brady's LABXPERT™ Labelling System, you can label your vials, vial tops, slides, well plates and more, quickly and easily with durable materials designed specifically for the laboratory environment. The labels will not fall off or smear, can fit more information and are always legible.
- Recommended for printing 25 to 250 labels at a time
- Continuous and die-cut label styles, including tops, self-laminating and two label combinations
- Drop, Lock & Go Smart Cartridge combines labels and ribbon for a quick and easy change
- Built-in laboratory applications, including vial templates, time and date stamp and auto serialisation for aliquots
- Bar coding capabilities - 2D (only available when connected to software) and linear (code 39 and 128)
- 300 dpi printhead for sharper resolution on small fonts and bar codes
- Memory to store labels
- 140 Greek and laboratory symbols
- AA battery or AC power operation
- USB port for PC Connection
- Mirror image printing for through-dish viewing
- One-touch Time and Date Stamping
- Narrow bar code width to allow more characters on smaller labels

Clear Identification

"Being able to read people's handwriting was a major problem. Hand labelling was also very slow. We had to write with a felt-tipped marker on a really small space. We decided that an automated system to print labels was definitely in order."

Kevin Kershner
Scientist

BMP™71
Portable Label Printer

- The BMP71 mobile label printer can print on more than 30 different types of label material including 7 specifically for a laboratory environment - all designed with Brady's industrial strength durability.
- The powerful BMP71 prints faster than any other printer in it's class (38 mm/sec). Don't wait longer than necessary for your labels.
- The BMP71 has a full keyboard, available in 4 versions, QWERTY, AZERTY, QWERTZ and CYRILLIC. Use both your hands to type your text intead on one finger and save you time!
- The enlarged colour screen of the BMP71 enables you to see the whole label at once, helping you to compose the label in the most efficient way, eliminating trial and error.
- The BMP71 printer is your essential tool that handles all you label printing needs -
  One smart printer to print it all.

BBP™11 Desktop Thermal Transfer Printer

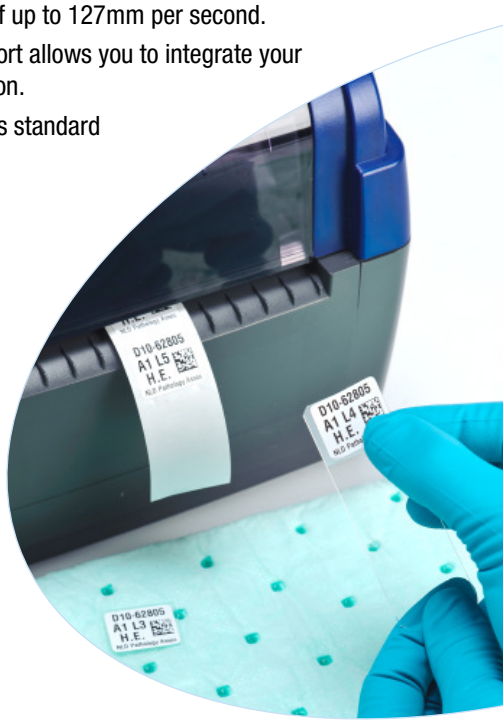

BBP™11
LABEL PRINTER

BBP™11
Desktop Thermal Transfer Printer

- The BBP11 is a compact desktop printer which provides high quality thermal transfer printing at a low cost. The Brady BBP11 is an entry level thermal transfer printer for vial and tube labels, Slide labels, bottles and many more.
- Identifying your laboratory equipment has never been so easy. Traceability of company assets is an absolute must these days and the BBP11 provides this solution.
- The BBP11 offers the best mix of high quality printing at a low cost price. The printer does not only yield high performance with durable and reliable output, it also provides important savings in desk space.
- This series is the ideal solution for low-to-medium volume printing, while offering a printout speed of up to 127mm per second.
- The standard internal ethernet port allows you to integrate your printer quickly into any application.
- USB Serial and parallel interfaces standard

B-492 and BBP11

"The BBP11 prints very quickly, providing a highly efficient way of producing labels for all the multiple tubes we need to freeze for each animal sample. The print quality looks very clear and neat, and we can get more information on our labels than before.

Brady's FreezerBondz™ labels not only withstand the long-term storage in liquid nitrogen required for samples going into the Frozen Ark, but they can be applied to frozen surfaces. This very useful property has enabled us to add labels to some tubes which had been stored with inadequate identification."

Institute of Zoology, Zoological Society of London, UK

IP™ Thermal Transfer Printer

- Load, Click, Print - it's that easy
- Brady's IP™ thermal transfer printing system is designed to make printing faster, easier and more efficient - helping you create a lean Just-In-Time production process.
- With reduced set-up time, easy material loading and intuitive label design software, laboratories can print their labels on-demand. The IP Printing system offers material recognition, automatic software formatting and user-friendly printer features

Communication Interfaces

- RS-232 Serial Port
- USB 2.0 High Speed Slave
- 10/100 Ethernet print server option
- RS-422, RS-484, 1,200 up to 230,400 Baud/8 bit
- Pheripheral Connection USB Master for Keyboard and Scanner 2X

LabelMark™
LABELING SOFTWARE

LabelMark™ Laboratory Labelling Software

LabelMark software features a lab-friendly interface and hundreds of parts and graphics categorised by common lab applications making creating legible, durable and accurate labels quick and easy.

- Easy-to-use Wizards to create new files and templates
- Superscript and subscript characters
- Database import capabilities with refresh feature to ensure data integrity
- 2D bar coding and linear bar coding
- Multi-label data entry view
- Compatibility with a variety of Brady printers including LABXPERT, BMP71,TLS models and all Windows®-based printers

Order Ref.	Order Reference	Description
622242	LM5 Std	LabelMark™ 5 Standard
622243	LM5 Pro	LabelMark™ 5 Pro

CODESOFT™

CodeSoft™ is a very powerful, feature-rich design software. It has the most text editing and bar code features, plus it is the best choice for advanced database importation and integration with 3rd party software programs - like LIMS.

- Over 100 Bar code symbologies including linear and 2D
- Robust data sourcing capabilities
- View labels and data in the same screen
- Label Comparison tool for previewing labels at design or production stages
- OLE automation supports object integration from any 3rd party Windows® application
- Enhanced Shape Tool makes using graphics and shapes on your labels a snap
- **CodeSoft Pro** - is for users printing text, images and bar codes on one to three printers
- **CodeSoft Enterprise** - is for user printing from databases and existing systems
- **CodeSoft Network** - is for users who want to manage licenses from a server

Order Reference	
CodeSoft™ 9 Enterprise	Full program with all features. Available in stand-alone and network versions (multiples of 5 users)
Codesoft™ 9 Pro	Lower cost alternative to Enterprise version. Robust program with the same text, bar code, graphic capabilities as Enterprise and most of the same "variable" capabilities, but without the advanced levels of security and bolt-on complimentary applications.

Scanners for Laboratories

Order Ref.	Order Reference	Description

361108	361108	CR2500 Scanner with 6ft USB
361109	CR1200 + 6ft USB	CR1200 Scanner with 6ft USB cable

Code Reader® Scanners

Scanners improve sample tracking, eliminate human error and save an enormous amount of time during both labelling and retrieving samples.

Code Reader Scanners combines the industry's best imaging technology with a graphic display and rugged keyboard that makes this new standard in small, fast user-friendly data and inventory management. Now the best portable all-symbology bar code reader in the industry is even more versatile, with the addition of information display and keyboard entry fucntions.

Dynamic Optimization Technology

There are 2 interface configurations available:

Cabled (Basic)
Plug-an-play interface. Available with (USB (standard. PS2 or RS232 interfaces. All cables use rugged automatic locking adapters that allow users to change cables while preventing inadvertent disconnections.

Batch (Basic + Battery)
Cables and Store and Forward capacity in one unit. Simply detach the scanner from the computer, capture data remotely and reconnect to the computer. When reconnected, the scanner will automatically download data to the active application. When connected via the included USB cable, the unit operates as a standard keyboard wedge.

Benefits of Bar Coding and Scanning

- Quickly identify and retrieve samples
- Eliminate human error with log-in an inventory data entry
- Accurately track samples and chemicals from receipt to disposal
- Automatically update sample information

Hazardous Substance Symbol Labels

Identification of Hazardous Substances

Each individual container which holds hazardous substances must be clearly marked to ensure safety in the work place. Slef-adhseive white paper labels are supplied on A4 sheets which can easily be printed with substance information on an office printer. The appropriate hazard symbol label can then be stuck to the printed paper label and then finally a clar, self adhesive, polyester overlaminate can be stuck over the top to fully protect the information printed underneath

Labels for dangerous substances must show the following information

- name of the dangerous substance(s)
- standard symbol or danger symbol
- risk text describing the specific danger
- text informing how risk can be reduced
- name and address of the manufacturer

It is the legal duty of all employees to mark dangerous substances!

This legal requirement reflects ona ll stages of the production process and subsequent use: stocking, packaging, mixing, transporting etc. Legislation dictates how products should be labelled

Blank Labels

Order Reference	Label Width A (mm) x Label Height B (mm)	Material	Labels/Package	Special Properties
LB 74x52/76205	52.00 x 74.00	Paper	512 Labels per pack	32 A4 sheets per pack

Portable Spill Kits

- SKH-Mini - A fully disposable spill kit to clean up small chemical spills quickly, easily and without risk on injuries
- Highly visible green colour
- The autoclavable disposal bag is heat resistant up to 145°C and therefore guarantees a safe disposal of laboratory waste
- Adsorbs chemicals, dangerous liquids, water & oil based fluids
- Suitable for spills up to 1.7 litres
- The specially designed disposable brush is intended to sweep up any broken glass or debris allowing a safe clean up without risk of injuries
- Thanks to the compact design, the SKH-MINI can easily be placed in areas where spills are most likely to happen
- Protective gloves are powder free, have roughened fingertips. Increased tear resistance and a good chemical resistance for more safety

Order Reference	Description	Special Properties	QTY.	Size - Width	Size - Length	Size - Height	Adsorption Capacity (Ltrs)	Weight (kg)
SKH-MINI	ADR Spill Kit	Contents: 2 pads 41 cm x 51 cm, 1 pair of disposable chemical protective gloves, 1 autoclavable disposal bag, 1 disposable brush, 1 multilingual instruction guide	4/Box	28 cm	22 cm	7 cm	6.8	2.1

Pillows

- Hazwik Pillows - For adsorbing spills & leaking liquids in tight spaces
- Adsorb chemicals, acids and bases
- Good for large spills once contained
- Ideal for use in packaging for extra protection during transport
- 2 different sizes to fit any application

Order Reference	Description	QTY.	Size - Width	Size - Length	Adsorption Capacity (Ltrs)	Weight (kg)
HAZ1818	PILLOW, 42 cm x 48 cm	16/Box	48 cm	43 cm	105	9.1
HAZ1818-2	PILLOW, 42 cm x 48 cm	8/Box	48 cm	43 cm	53	4.5
HAZ99	PILLOW, 43 cm x 48 cm	32/Box	25 cm	25 cm	58	4.5

Lean Laboratory - Sorbent Products

UN Booms

- UN Booms - The best way to adsorb and contain large spills of chemicals and hazardous liquids
- Adsorbs chemicals, acids and bases as well as oils and water based liquids
- Metal clips and rings allows for easy linking of booms
- Inner rope secured with 4 clips provides strength
- Stronger outer sleeve for durability
- Inner sleeves keeps the adsorbent material intact with the boom

Order Reference	Description	Labels/ Package	Size - Length	Adsorption Capacity (Ltrs)	Weight (kg)
UN810	BOOM, Ø 20 cm x 3 m	4/Bale	3 m	263	18.3
UN510	BOOM, Ø 13 cm x 3 m	4/Bale	3 m	118	8.3

Socs

- Hazwik Socs - Confine & prevent hazardous spills from spreading
- Adsorb chemicals, acids & bases
- Different lengths in order to always have the right size for your application
- Flexible design is easily moulded around machines and spills

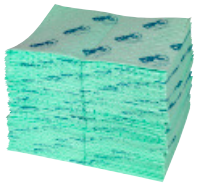

Order Reference	Description	QTY.	Size - Length	Adsorption Capacity (Ltrs)	Weight (kg)
HAZ412	SOC, Ø 7.6 cm x 122 cm	12/Box	122 cm	45	5.3
HAZ806	SOC, Ø 7.6 cm x 244 cm	6/Box	244 cm	48	5.5
HAZ124	SOC, Ø 7.6 cm x 122 cm	4/Box	366 cm	45	5.3

UN Pads and Rolls

For use when chemical and hazardous liquids are involved!

- Adsorb a wide range of chemicals including acids and caustics
- One-sided spunbond gives extra strength as well as lower lint
- Chemically inert: product does not degrade or cause a dangerous chemical reaction with the adsorbed liquid
- Green colour alerts workers that product is being used for hazardous liquids
- Green colour also allows the user to identify and seperate hazardous waste for disposal, resulting in lower disposal costs
- Perforated for flexibility - tear at the perforations for smaller sized pads, to use only what you need

Order Reference	Description	QTY.	Size - Width	Size - Length	Adsorption Capacity (Ltrs)	Weight (kg)
UN100-E	PADS, 41 cm x 51 cm, Medium weight, perforated & bonded	100/Box	51 cm	41 cm	88	7.1
UN1212-E	PADS, 30 cm x 30 cm, Medium weight, bonded, 50 pads/bag-4 bags/disp.box	200/Box	30 cm	30 cm	76	6.7

Order Reference	Description	QTY.	Size - Width	Size - Length	Adsorption Capacity (Ltrs)	Weight (kg)
UN15-2DP-E	ROLL, 38 cm x 46 m, Medium weight, double perforated & bonded	2/Box	38 cm	46 m	147	11.3
UN15-DP-E	ROLL, 38 cm x 46 m, Medium weight, double perforated & bonded	1/Dispenser box	38 cm	46 m	73	6.3
UN15-DPS-E	ROLL, 38 cm x 22 m, Medium weight, double perforated & bonded	1/Dispenser box	38 cm	22 m	35	3.6
UN30-DP-E	ROLL, 76 cm x 46 m, Medium weight, double perforated & bonded	1/Box	76 cm	46 m	147	11.8

SPC - Sorbent Products

Your partner in helping your business guard against the leaks, drips and spills that create safety and environmental hazards in the workplace with quality sorbent products.

Contact your Brady Distributor to receive a copy of the SPC catalogue

Mini-Markers

- The Mini Marker (150 x 12 mm) has been specially developed by Brady for the identification of small pipes. Ideal for marking Piped Medical Gases, these markers are made from thin, flexible polyester (B-7541). They are sold by the card, with 5 markers per card.
- For Pipes with a diameter from 6 to 20mm
- Many legends available - please visit www.bradyeurope.com for full listing

Marker Width A (mm)	Marker Height B (mm)	Letter Height (mm)	Markers per Card	Max. # Characters	
-	-			With Symbols	Without Symbols
150.00	12.00	6.5	5	15	17

Safety Signs on Rolls - Laminated Polyester

- Material: Laminated Polyester
- Number of signs per roll: 250
- Available Sizes: Triangular with sides of 25, 50 or 100 mm

Size Triangle Side)	PIC 302	PIC 303	PIC 304	PIC 312
25 mm	227327	800100	251955	227333
50 mm	227355	800101	223315	227361
100 mm	227302	800102	223316	227308

Storage Unit for Safety Glasses

Eye Protection Storage Unit

Storage Units for Eye Protection Equipment

- Storage units for Visitor Safety Equipment
- Ensure the safety of your staff and your visitors!
- Safe, clean storage of eye protection at work. Ideal for safety goggles and safety glasses. Labelled with appropriate safety symbol for quick and easy identification.
- Place either of these units at your reception desk, at the entrance of buildings or at the start of a danger zone where wearing specific safety equipment is obligatory: labs, workshops, etc., especially for visitors and maintenance personnel.
- Can be attached with adhesive or screws:
- 2 Styles available, please visit www.bradyeurope.com for further details
- Eye protection storage unit

Order Ref.	Description	Height (mm)	Width (mm)	Depth (mm)	Legend
223933	Storage Unit for Visitor Safety Equipment	297.00	210.00	–	Dispenser - Wear eye protection
224045	Storage Unit	315.00	236.00	200	–
